### **Quality Control Procedure:**

- 1) For the bulk production - starting from the Fabric Checking, Sewing and Printing to compare with customer's requirement as well as the assortment for master carton accordingly. Especially our QC teams check the Fabric weight, Shrinkage, color variation between lot to lot and Pattern before start test cutting so that we can meet the customer's requirement according to size spec during the bulk.
- 2) Our Quality control team check and collect everyday production report from factory and based on this we also check the delivery possibilities as per buyer's required and if we found and think that delivery will be delay for any particular reason then we can take necessary action in prior to avoid the late delivery.
- 3) In generally, we offer our Buyers to follow 3 steps of inspection procedure. (i) In-line, (ii) Intermediate, (iii) Final inspection, if buyer is able to come over for inspection. Besides this, our Inspection team also follows the goods quality everyday as a regular practice.
- 4) We do our Final Inspection based on basically AQL standard 2.5. If buyers require an upper AQL standard we also follow accordingly.

### **Quality Assurance:**

All merchandise products undergoes a strict scrutiny of quality. Quality merchandise does not just come out the machines. We strive hard to produce quality items on a consistence basis; and to sustain a high level of quality. We adhere to the quality control manuals provided by our clients.

### **Price Goods Quality Control:**

We carry out approx. 10% to 20% inspection of all pieces of goods prior to spreading. Four points system are followed to classify defects. Defects classification list has been set up to simplify the language and judgments used to make visual fabric evaluation. Rolls are segregated shade wise prior to spreading.

### **Cutting Department Quality Control:**

Final pattern are checked thoroughly against measurement to control spec deviation, ply numbering, stickers and building is followed to control shading within lots. Random sampling is done prior to cutting to determine shrinkage and any other characteristic that may exist in the fabric.

### **In Process Quality Control:**

In line audit is carried out by qualified inspectors to correct the problem at the sewing level rather than after the garments have been completely assembled. Written qualities standard are set up to give emphasis on critical operation. A separate Q.A. team independent of production has been appointed to evaluate the quality of goods being sewn.

### **Random Final Statistical Report**

Once merchandise has been duly checked/inspected by the finishing section, a final audit is carried out by qualified QCs. Merchandise are presently audited at 4.0 AQL. We are seeking to attain 2.5 AQL in near future.

### **Product Safety Guide**

We are maintaining our production as per product safety guide.

### **Commercial**

Mohabbat Garments & Printing Industries has a unique commercial team dedicated to unhindered marketing of its goods and timely shipping. This team is well groomed-up under the prudent guidance of GM, Marketing & Commercial. The motto of this department is to respond round the clock from any part of the globe; just to meet the demand of our valued customers. Our commercial department is always at your reach through modern gadget/equipment.
